Compute

Compute:

B1MS, 1 vCore(s), $0.02/hour

1 Servers or Nodes ⓘ × 730 Hours = $15.69

Storage

Tier:

Premium SSD

32 GiB × $0.151 Per GiB = $4.83

Backup Storage

Redundancy:

LRS

There is no additional charge for backup storage for up to 100% of your total provisioned server storage. Additional consumption of backup storage, i.e. geo-redundant storage (GRS), will be charged in GB/month. GRS requires twice the amount of storage capacity because it creates a replica. Price per GB remains the same.

Backup Storage

0	GiB

0	×	$0.113	=	$0.00
Consumed storage (GiB)		Per GiB		

Extended Support

Extended support gives you continued access to critical security updates and technical assistance for up to three years after standard support ends. To check if your database requires Extended Support, please refer to the Microsoft Learn (https://docs.microsoft.com/en-us/azure/postgresql/configure-maintain/concepts-version-policy/) guidance.

CURRENCY United States – Dollar ($) USD

Prices are estimates only and are not intended as actual price quotes. Actual pricing may vary depending on the type of agreement entered with Microsoft, date of purchase, and the currency exchange rate. Prices are calculated based on US dollars and converted using London closing spot rates that are captured in the two business days prior to the last business day of the previous month end. If the two business days prior to the end of the month fall on a bank holiday in major markets, the rate setting day is generally the day immediately preceding the two business days. This rate applies to all transactions during the upcoming month. Sign in to the Azure pricing calculator (/en-us/pricing/calculator/) to see pricing based on your current program/offer with Microsoft. Contact an Azure sales specialist (/en-us/contact/pricing/) for more information on pricing or to request a price quote. See frequently asked questions (/en-us/pricing/) about Azure pricing.
